

JUNKKIE

MINI PROJECT

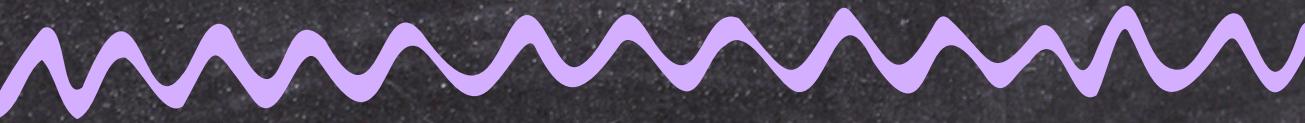

Introduction

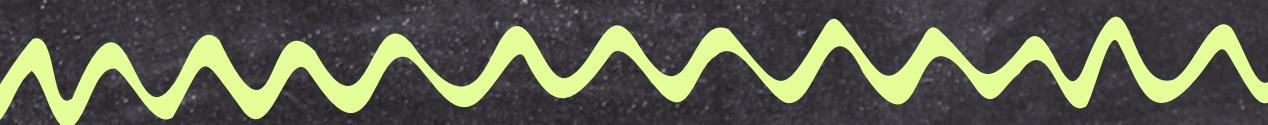

- > Hii everyone, We have a website.
- > In this project we are dealing with some problems like Food wastage, usage of plastics, calorie measurement etc.
- > We are planning to achieve our goals by collaborating with some NGO.
- > Supplying hygenic food with real data.
- > Users can calculate their daily required calorific value.

Project overview

Our project aims to address the issue of food waste, reduce use of plastics and promote efficient utilization of resources. This project also involves food marketing for business purposes. We have also collabed with NGO's so users can easily donate excess food items that will help in reducing food waste and contribute to addressing hunger in the community.

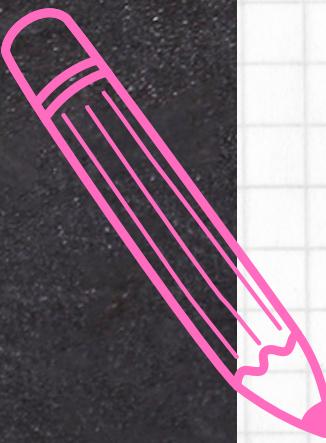

Technology used

- >HTML
- >CSS
- >JAVASCRIPT
- >Web Browser
- >Microsoft Office

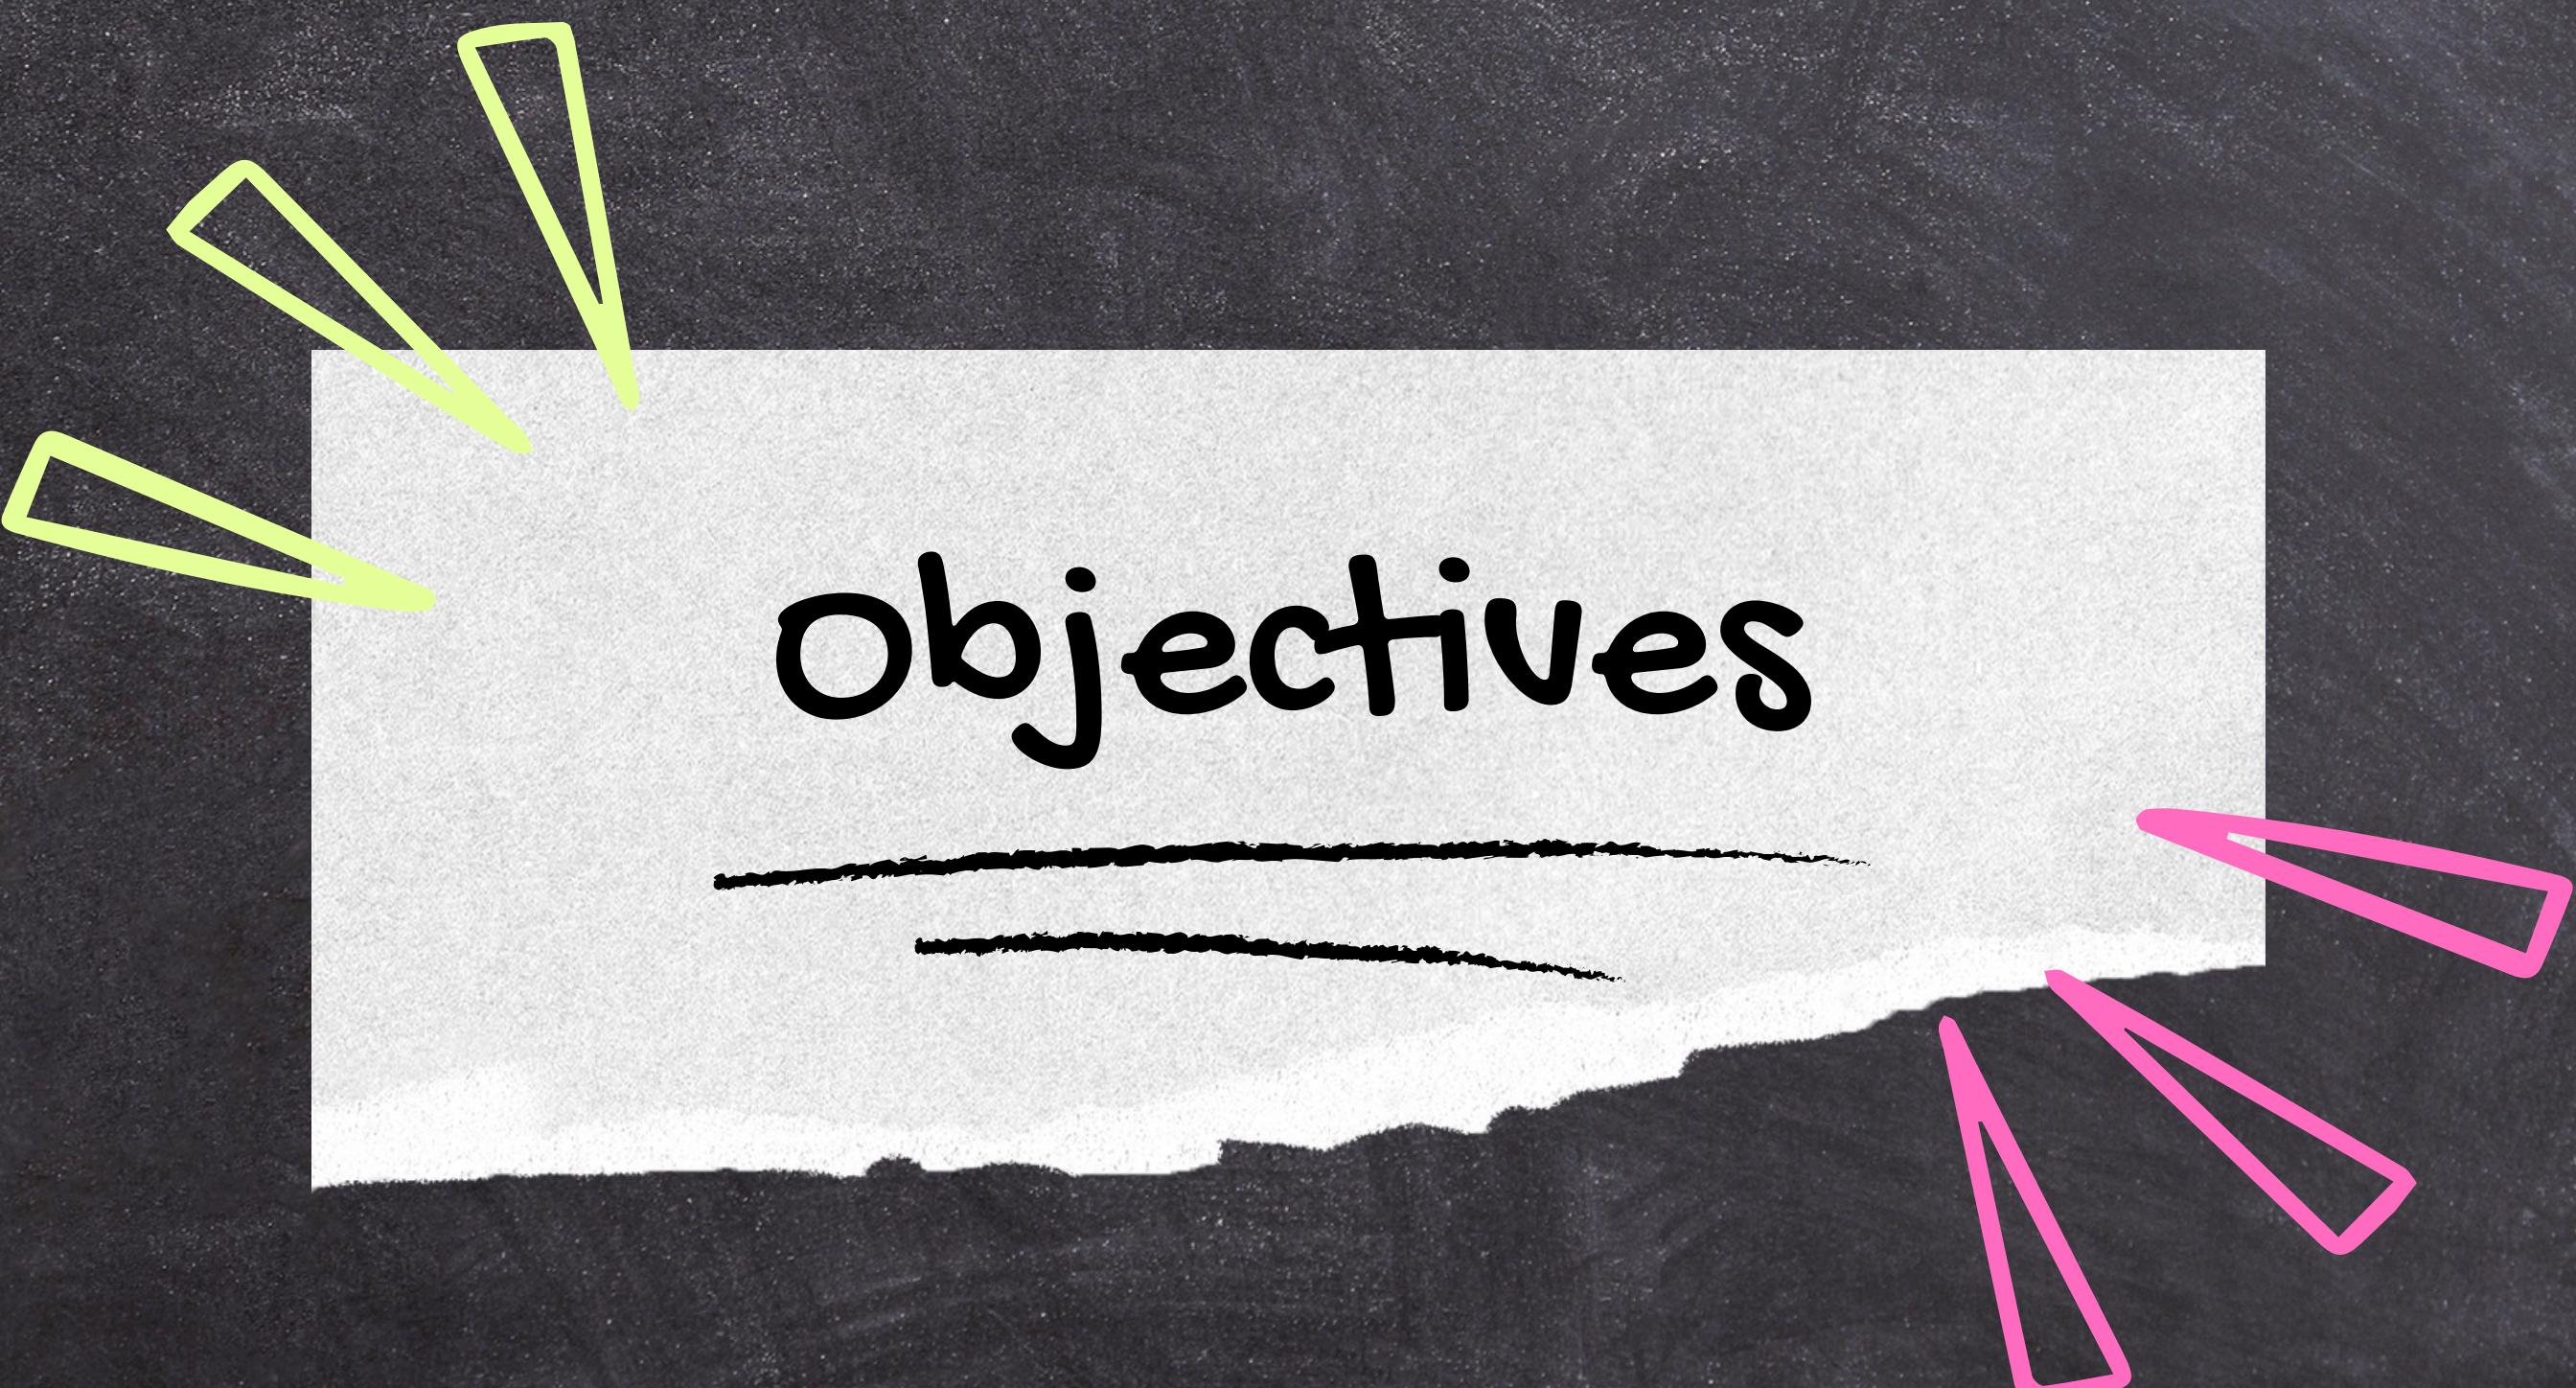

Some salient features

- Minimum use of plastics by packaging with eco friendly materials.
- Maintain hygenic production of orders under our supervisors.
- Users can donate their excess food items through our website and redeem heavy discounts on their next orders.
 - We will pick up the food parcels ourselves.
 - The food parcels will be delivered to those in need with the help of our NGO's.

Why choose us?

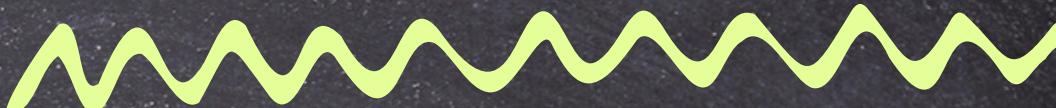

- User can quickly order their favorite food without any hassle.
- Quick delivery with live tracker.
- User friendly interface.
- User can calculate calorific value
- Friendly customer care services.
- Multiple payment options.
- User can easily calculate the calorific value.

Objectives

Objectives

1

MANAGE FOOD WASTAGE:

collecting the excess food items from people and delivering food to those in need by collaborating with NGO's.

2

FOOD MARKETING:

Providing Healthy and Hygenic food to every household which will also help us in our Fundings.

3

REDUCTION OF PLASTICS

we also focus on the reduction of plastics by using eco friendly pakages

Objectives

4

JOB OPPORTUNITIES:

Providing job opportunities

5

Calorific Value:

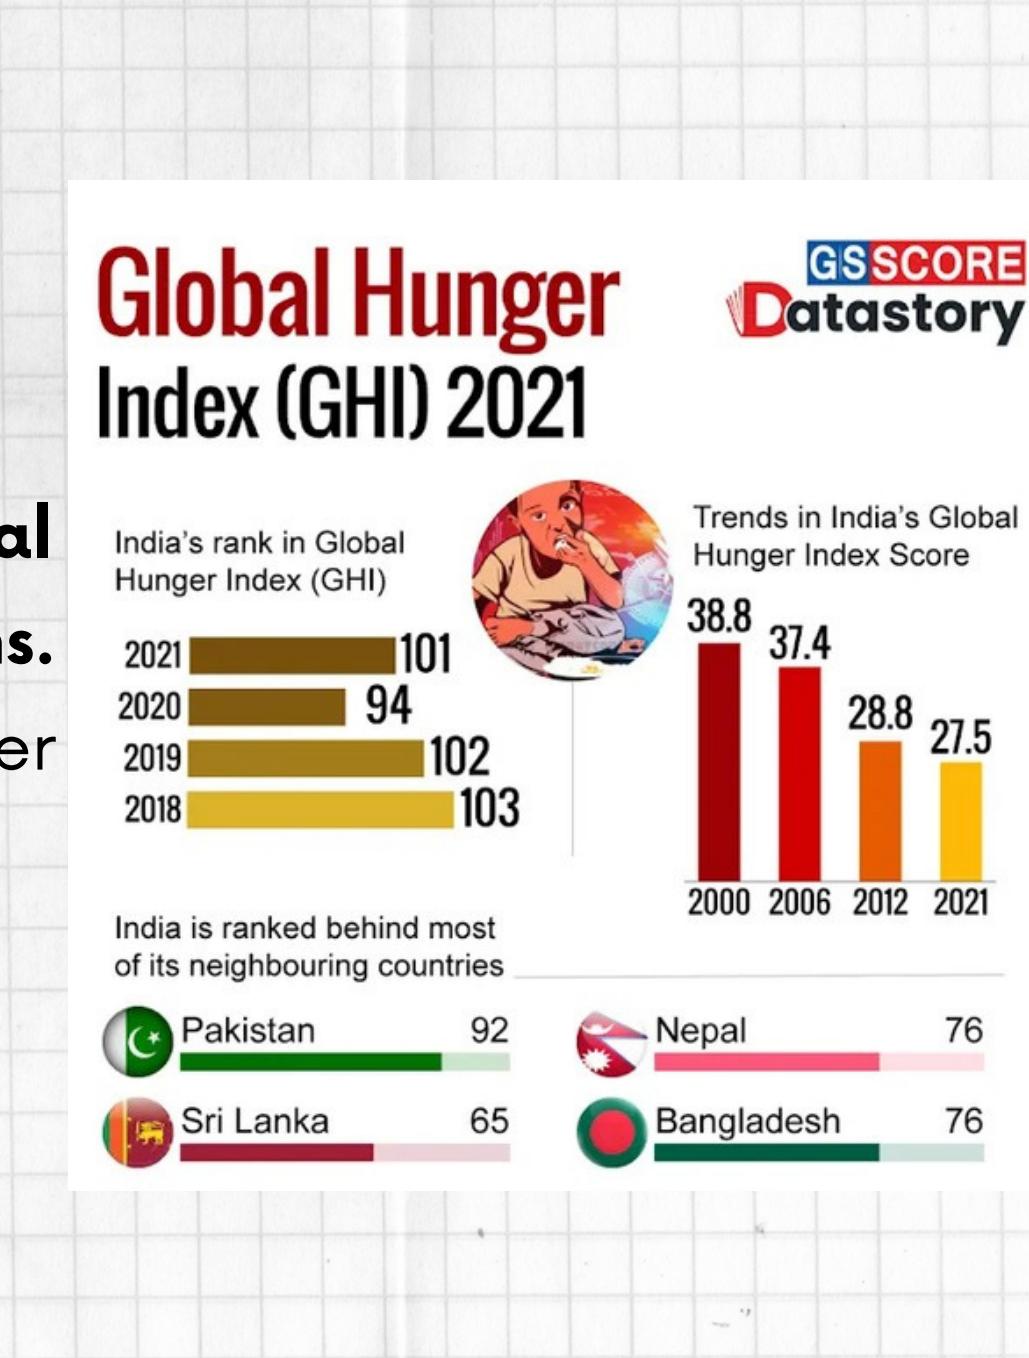

User can Calculate and
Order food according
to Calorific Needs.

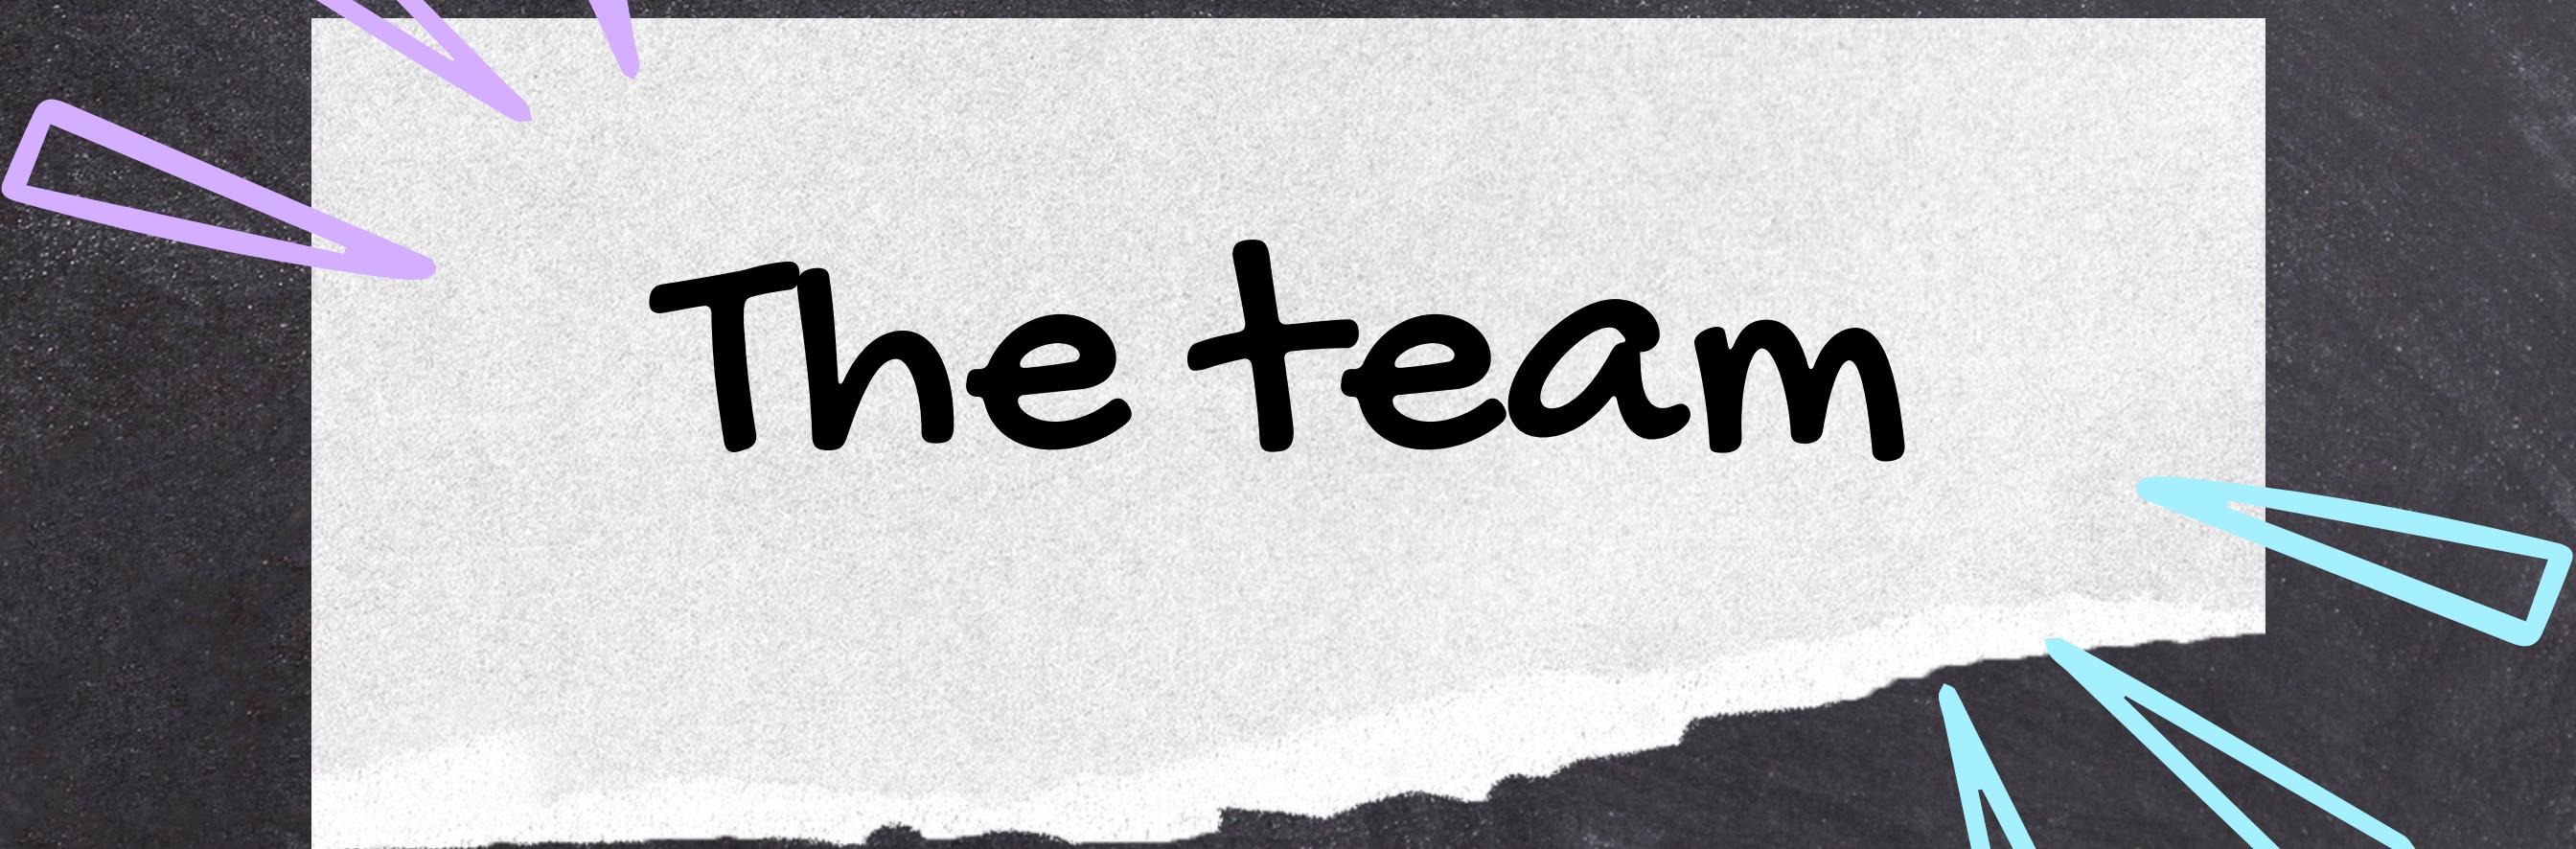

JUNKKIEE

Conclusion

As per data India ranks 111 out of 125 countries in global hunger index in 2022. So **our main Goal is to provide the food for all the needy persons.** so we can try to contribute to make India Hunger free.
